

# DiSEqC 4 x 1 switch

global **invacom**  
completing the picture

- 25dB isolation
- low loss
- water resistant

## Product description

A 4 input 1 output switch controlled by the DiSEqC protocol.

A typical application is the switching between 4 universal LNBs, where the 22KHz tone is used for LNB band selection.

Intended for control by DiSEqC equipped receivers, It is in a screened metal box enclosed by a rainproof plastic housing. This plastic housing is easily attached to the dish and obviates the need to seal the connectors with tape or rubber boots.

The 4x1 has 2 integrated 1.5m long cables for ease of connection to a distribution system.

## Specification

Freq.Range	700-2350MHz
Insertion Loss	4dB $\pm$ 1dB
Isolation	25dB
External Instal	YES
